These are the four most important functions of Cover Expert. Distinguish between CD and DVD: Comes with options to distinguish between CD and DVD covers. Create 'virtual' CD and a69d392a70

Cover Expert Free Download

Cover Expert is a software that enables you to create virtual covers for your CDs, DVDs, books, brochures or magazines. It's the kind of tool you would need with marketing presentations. The user interface of the program is simple and intuitive. On the left side of the screen you can preview results and on the right you can select objects and actions from several tabs. Thus, you can start by inserting an object in the "Preview" window, from templates or from "Scene" (e.g. billboard, book, card, LCD TV, paperback). Then you can add textures (from your hard drive) to each side of the object. From this point on, you can use tools to verify results, such as "Translate", "Rotate", "Scale". Furthermore, you can adjust the camera settings (e.g. horizontal and vertical rotation, zoom, perspective), lighting (e.g. global light brightness, distance for each light source), shadows (direction, length, intensity, blur) and reflection (length, opacity, background color). Once you are satisfied with the results, you can configure rendering options (format, output name and destination, image size and properties) and, finally save your image. Plus, you can change the interface theme and language, save the project in the Covert Expert format or as a template. The program uses a moderate to high amount of system resources and comes with a comprehensive help file that includes screenshots. All in all, Cover Expert is a great tool for creating virtual covers, but it needs some debugging and upgrades. Even so, we recommend it to all users, due to the fact that it's easy to work with. Cover Expert is a software that enables you to create virtual covers for your CDs, DVDs, books, brochures or magazines. It's the kind of tool you would need with marketing presentations. The user interface of the program is simple and intuitive. On the left side of the screen you can preview results and on the right you can select objects and actions from several tabs. Thus, you can start by inserting an object in the "Preview" window, from templates or from "Scene" (e.g. billboard, book, card, LCD TV, paperback). Then you can add textures (from your hard drive) to each side of the object. From this point on, you can use tools to verify results, such as "Translate", "Rotate", "Scale". Furthermore,

What's New in the Cover Expert?

Create a stunning cover for your CDs, DVDs, books, brochures or magazines. Insert objects, such as parts of your CD, DVD or book or a picture of a friend or family member. In order to create your cover, you first insert an object in the "Preview" window, from one of the pre-defined templates (e.g. billboard, book, card, LCD TV, paperback) or from "Scene" (e.g. billboard, book, card, LCD TV, paperback). Then you can add textures from your hard drive to the object's sides. From this point on, you can use a number of tools (e.g. "Rotate", "Scale", "Crop"), to verify results such as perspective and rotation, length, blur, and transparency. Furthermore, you can adjust the camera settings (e.g. horizontal and vertical rotation, zoom, perspective), lighting (e.g. global light brightness, distance for each light source), shadows (direction, length, intensity, blur), reflections (length, opacity, background color), and anti-aliasing (length, opacity). You can also render your objects in three different formats (tiff, png, jpeg) and save the project in the Covert Expert format or as a template. Plus, you can change the interface theme and language, save the project in the Covert Expert format or as a template, or export the project as a cover file ready to be used in your publisher's software. Features: Create stunning, professional looking virtual covers for your CDs, DVDs, books, brochures or magazines, with this application. Cover Expert enables you to insert images of your CDs, DVDs, books, brochures or magazines and bring them to life by adding textures, colors and reflections, with great results. In addition, you can add objects and move them around as well as change their perspective, position, rotation and length. You can even add shadows to these objects, have them blur, alter their size and much more. You can either import images of CDs, DVDs or books, or insert them from your hard drive. Once that is done, you can apply effects to the actual object, to bring it to life. All in all, this program can be used to create virtual covers for all types of books, CDs, DVDs, or magazines. Thus, you have the right software to make your projects look professional, for any type of presentation. Additional features
